

# Revolutionizing Environmental Monitoring

Customizable, real-time data monitoring with alerts, Cellular and Wi-Fi connectivity, affordability, and versatility.

## The Spider Thermo Advantage

Cutting-edge sensors connect to remote cloud monitoring software, which logs vital information in real-time.

### 24/7 Monitoring Visibility

Measure, track, and respond to live alert notifications of humidity, temperature, door status, differential pressure, leak prevention, oxygen, and power failures.

### Automated Cloud Management

Connect to compliance monitoring and reporting from mobile or web devices.

### Intelligent Real-Time Alerting

Customize notifications and communication flows for timely preventive action.

### NIST Calibration Services

Ensure accuracy and compliance with on-site and off-site management, tracking, alerts, automated review, and calibration of devices.

### Simplified Implementation

Easily install and set up connectivity to internal networks with embedded cellular technology.

# Smart Solutions for Any Critical Environment

Discover how our innovative smart monitoring systems are transforming various industries, including forensics, healthcare, pharmaceuticals, agriculture, vaccines, and food service.

## Forensics Labs

We provide forensic facilities with reliable monitoring to preserve the integrity of sensitive evidence.

## Healthcare

In the healthcare sector, our environmental monitoring systems ensure the safety of patient samples, medications, and vaccines.

## Pharmaceuticals & Labs

Our temperature monitoring system safeguards pharmaceutical products, minimizing the risk of audit failure or product loss.

## Agriculture

By optimizing production through environmental monitoring, our solutions empower the agricultural sector.

## Pediatric Vaccines

Streamline vaccine handling with our real-time tracking and CDC-compliant, cost-effective environmental monitoring solutions.

## Dietary Food Service

Ensure optimal food storage conditions and enhance safety and efficiency with our advanced monitoring systems.

## Total Compliance Guaranteed

Boost efficiency with automated readings, documentation, and cloud connectivity.

- ISO/IEC 17025
- ANSI/NCSL Z450-1
- ANSI/NCSL Z540.3 through A2LA
- Joint Commission
- State Board of Health
- CDC Storage and Handling of Vaccines
- Vaccines for Children Program
- American Association of Blood Banks
- Clinical Laboratory Improvement Amendments
- United States Pharmacopeia 797 and 800
- College of American Pathologists
